

Left atrium - left ventricle dynamics

$$A(q)y(k) = B(q)u(k - d) + e(k)$$

???

when the change happens?

$$G(s) = k \frac{\left(\frac{s}{\omega_1} + 1 \right)^{\alpha_1}}{\left(\frac{s}{\omega_2} + 1 \right)^{\alpha_2}}$$

How strong is the change?
